The U.S. Census Bureau is an Equal Opportunity Employer.
Why We Ask

The 2020 Census is easy. The questions are simple.

NAME
We ask for names to ensure everyone in the house is counted. Listing the name of each person in the household helps respondents include all members, particularly in large households where a respondent may forget who was counted and who was not.

SEX
We ask about the sex of each person to create statistics about males and females. Census data about sex are used in planning and funding government programs, and in evaluating other government programs and policies to ensure they fairly and equitably serve the needs of males and females. These statistics are also used to enforce laws, regulations, and policies against discrimination in government programs and in society.

AGE AND DATE OF BIRTH
We ask about age and date of birth to understand the size and characteristics of different age groups and to present other data by age. Local, state, tribal, and federal agencies use age data to plan and fund government programs that provide assistance or services for specific age groups, such as children, working-age adults, women of childbearing age, or the older population. These statistics also help enforce laws, regulations, and policies against age discrimination in government programs and in society.

HISPANIC, LATINO, OR SPANISH ORIGIN
We ask about whether a person is of Hispanic, Latino, or Spanish origin to create statistics about this ethnic group. The data collected in this question are needed by federal agencies to monitor compliance with antidiscrimination provisions, such as under the Voting Rights Act and the Civil Rights Act.

RACE
We ask about a person’s race to create statistics about race and to present other statistics by race groups. The data collected in this question are needed by federal agencies to monitor compliance with antidiscrimination provisions, such as under the Voting Rights Act and the Civil Rights Act. State governments use the data to determine congressional, state, and local voting districts.

WHETHER A PERSON LIVES OR STAYS SOMEWHERE ELSE
Our goal is to count people once, only once, and in the right place according to where they live on Census Day. Keeping this goal in mind, we ask this question to ensure individuals are not included at multiple addresses.

RELATIONSHIP
We ask about the relationship of each person in a household to one central person to create estimates about families, households, and other groups. Relationship data are used in planning and funding government programs that provide funds or services for families, people living or raising children alone, grandparents living with grandchildren, or other households that qualify for additional assistance.
Why We Ask

The 2020 Census is easy. The questions are simple.

The census asks questions that provide a snapshot of the nation. Census results affect your voice in government, how much funding your community receives, and how your community plans for the future.

When you fill out the census, you help:

- Determine how many seats your state gets in Congress.
- Guide how more than $675 billion in federal funding is distributed to states and communities each year.
- Create jobs, provide housing, prepare for emergencies, and build schools, roads and hospitals.

**POPULATION COUNT (NUMBER OF PEOPLE LIVING OR STAYING)**

We ask this question to collect an accurate count of the number of people at each address on Census Day, April 1, 2020. Each decade, census results determine how many seats your state gets in Congress. State and local officials use census counts to draw boundaries for districts like congressional districts, state legislative districts, and school districts.

**ANY ADDITIONAL PEOPLE LIVING OR STAYING**

Our goal is to count people once, only once, and in the right place according to where they live on Census Day. Keeping this goal in mind, we ask this question to ensure that everyone living at an address is counted.

**OWNER/RENTER**

We ask about whether a home is owned or rented to create statistics about homeownership and renters. Homeownership rates serve as an indicator of the nation’s economy and help in administering housing programs and informing planning decisions.

**PHONE NUMBER**

We ask for a phone number in case we need to contact you. We will never share your number and will only contact you if needed for official Census Bureau business.

Revised July 2019

The 2020 Census at a Glance

Counting everyone once, only once, and in the right place.

The U.S. Census Bureau is the federal government’s largest statistical agency. We are dedicated to providing current facts and figures about America's people, places, and economy. Federal law protects the confidentiality of all individual responses the Census Bureau collects.

The U.S. Constitution requires that each decade we take a count—or a census—of America’s population.

The census provides vital information for you and your community.

- It determines how many representatives each state gets in Congress and is used to redraw district boundaries. Redistricting counts are sent to the states by March 31, 2021.
- Communities rely on census statistics to plan for a variety of resident needs including new roads, schools, and emergency services.
- Businesses use census data to determine where to open places to shop.

Each year, the federal government distributes more than $675 billion to states and communities based on Census Bureau data.

In 2020, we will implement new technology to make it easier than ever to respond to the census. For the first time, you will be able to respond online, by phone, as well as by mail. We will use data that the public has already provided to reduce followup visits. And, we are building an accurate address list and automating our field operations—all while keeping your information confidential and safe.

KEY MILESTONES

2018
- 2018 End-to-End Census Test
- 2020 Census questions sent to Congress by March 31, 2018
- Six regional 2020 Census offices and 40 area census offices open

2019
- Partnership activities launch
- Complete Count Committees established
- Census takers update address list in person
- Remaining 248 area census offices open

2020
- Advertising begins in January 2020
- Public response (online, phone, or mail) begins
- Census Day—April 1, 2020
- Census takers visit households that haven’t responded
- Apportionment counts sent to the President by December 31, 2020

2021
- Redistricting counts sent to the states by March 31, 2021
Overview of Census Bureau Programs

CENSUSES

- The **decennial census** is the once-a-decade population and housing count of all 50 states, the District of Columbia, Puerto Rico, and the Island Areas. The results of the census determine the number of seats for each state in the U.S. House of Representatives and are used to draw congressional and state legislative districts. Federal agencies use the results to distribute more than $675 billion in federal funds each year.
- The **economic census** measures the nation’s economy every five years, providing vital statistics for virtually every industry and geographic area in the country.
- The **Census of Governments** provides comprehensive data about the 90,000 state and local governments in the nation every five years.

SURVEYS

- The **American Community Survey** (ACS) is an ongoing national survey—sampling approximately 3.5 million addresses annually—that provides vital information about our nation’s housing and people. The ACS is the only source of comparable, quality information about the people in all our communities. These data show what the U.S. population looks like and how it is changing. ACS data are used to assess the past and present and to plan for the future.
- **Demographic surveys** measure income, poverty, education, health insurance coverage, housing quality, crime victimization, computer usage, and many other subjects.
- **Economic surveys** are conducted monthly, quarterly, and yearly. They cover selected sectors of the nation’s economy and supplement the economic census with more-frequent information about the dynamic economy. These surveys yield more than 400 annual economic reports, including principal economic indicators.
- **Sponsored surveys** are demographic and economic surveys that we conduct for other government agencies. They include the Current Population Survey, the National Health Interview Survey, and the National Survey of College Graduates.

Your information is protected by law

The law requires the Census Bureau to keep your information confidential and use your responses only to produce statistics. We cannot publicly release your responses in any way that could identify you. We will never share your information with immigration enforcement agencies such as ICE, law enforcement agencies such as the FBI or police, or allow it to be used to determine your eligibility for government benefits.

Our Mission

To serve as the nation’s leading provider of quality data about its people and economy.

Our Vision

To be the trusted source for timely and relevant statistical information, and the leader in data-driven information.

Census History

Thomas Jefferson directed the first decennial census in 1790. As required by the U.S. Constitution, a census has been taken every 10 years thereafter. In 1840, the Census Act authorized the establishment of a centralized Census Office. In 1902, the Census Office became a permanent organization within the Department of the Interior. A year later, it was renamed the Bureau of the Census and moved to the new Department of Commerce and Labor.

How the 2020 Census will invite everyone to respond

What to Expect in the Mail

When it’s time to respond, most households will receive an invitation in the mail.
Every household will have the option of responding online, by mail, or by phone.

Depending on how likely your area is to respond online, you’ll receive either an invitation encouraging you to respond online or an invitation along with a paper questionnaire.

Letter Invitation

- Most areas of the country are likely to respond online, so most households will receive a letter asking you to go online to complete the census questionnaire.
- We plan on working with the U.S. Postal Service to stagger the delivery of these invitations over several days. This way we can spread out the number of users responding online, and we’ll be able to serve you better if you need help over the phone.

Letter Invitation and Paper Questionnaire

- Areas that are less likely to respond online will receive a paper questionnaire along with their invitation. The invitation will also include information about how to respond online or by phone.

---

**WHAT WE WILL SEND IN THE MAIL**

<table>
<thead>
<tr>
<th>On or between</th>
<th>You’ll receive:</th>
</tr>
</thead>
<tbody>
<tr>
<td>March 12-20</td>
<td>An invitation to respond online to the 2020 Census. (Some households will also receive paper questionnaires.)</td>
</tr>
<tr>
<td>March 16-24</td>
<td>A reminder letter.</td>
</tr>
<tr>
<td></td>
<td><strong>If you haven’t responded yet:</strong></td>
</tr>
<tr>
<td>March 26-April 3</td>
<td>A reminder postcard.</td>
</tr>
<tr>
<td>April 8-16</td>
<td>A reminder letter and paper questionnaire.</td>
</tr>
<tr>
<td>April 20-27</td>
<td>A final reminder postcard before we follow up in person.</td>
</tr>
</tbody>
</table>

We understand you might miss our initial letter in the mail.

- Every household that hasn’t already responded will receive reminders and will eventually receive a paper questionnaire.
- It doesn’t matter which initial invitation you get or how you get it—we will follow up in person with all households that don’t respond.
Every household will have the option of responding online, by mail, or by phone.

Nearly every household will receive an invitation to participate in the 2020 Census from either a postal worker or a census worker.

✉️ 95% of households will receive their census invitation in the mail.

Almost 5% of households will receive their census invitation when a census taker drops it off. In these areas, the majority of households may not receive mail at their home's physical location (like households that use PO boxes or areas recently affected by natural disasters).

📍 Less than 1% of households will be counted in person by a census taker, instead of being invited to respond on their own. We do this in very remote areas like parts of northern Maine, remote Alaska, and in select American Indian areas that ask to be counted in person.

Note: We have special procedures to count people who don’t live in households, such as students living in university housing or people experiencing homelessness.
